Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by
Silverbrook et al. (US Patent 6,588,952)

The applied reference has a common inventor with the instant application.
Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Regarding claim 1, Silverbrook et al. teaches an inkjet cartridge (504, Figure 1) having a page width print head (Column 1, Lines 44-49), an ink supply, an ink delivery path (514) directly between the ink supply and the print head (element 516, Abstract, Column 2, Lines 59-67 and Column 3, Lines 1-7), an authentication device (refer to element QA chip not shown as referred in Column 4, Line 54), a cradle body (502) complementary to the inkjet cartridge, the inkjet cartridge being removably

received in the cradle body (Column 2, Lines 22-24, 49-51 and Figure 3), a data connection point (716) fast with the cradle body for receiving data signals defining images for printing from an external data source and a processor (720, 721) coupled to the data connection point and arranged to operate the page width print head in response to the data signals to print images and to verify authenticity of the cartridge by communicating with the authentication device of the cartridge (Column 4, Lines 46-58).

Regarding claim 2, Silverbrook et al. teaches wherein the cradle body defines a recess to receive the removable inkjet cartridge (Figures 4, 5, 8 and 9).

Regarding claim 3, Silverbrook et al. teaches a power connection point (720) for receiving operative power from an external power source (Column 4, Lines 46-58).

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Cook (US Patent 6,158,850) teaches an print head with a microprocessor.
- b. Norton (US Patent 6,293,649) teaches a print cartridge used in a inkjet printer.
- c. Barclay et al. (US Publication 2003/0007023) teaches a wide format inkjet print engine.
